DETAILED ACTION

Allowable Subject Matter

1. Claim 1-30 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record used was Stallaert (US 6,035,287). Stallaert allows market participants to exchange bundles of assets, in different asset classes. A market participant may value the bundle as an entity, alleviating the need to attempt to attain a value objective in the aggregate by valuing the trading assets individually. The prior art of record fails to disclose the combination of sample assets according to risk, underwrite assets, build regression models, select the best models for underwritten assets and use the selected model to make a prediction of underwriting value for the non-underwriting assets such that the predicted underwriting value for the non-underwriting asset with partial or incomplete data representations is based on at least one of fully underwritten non-written assets with partial or incomplete data representations having similar identifiable characteristics as disclosed in independent claims 1, 11, 21.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
